OTCQB: CAMNF

EXPLORING FOR COPPER & GOLD

IN YUKON, CANADA

Corporate Presentation – July 2026

FORWARD-LOOKING STATEMENTS

This presentation contains forward-looking information. Forward looking information contained in this presentation includes, but is not limited to, statements with respect to the success of exploration activities.

These statements are based on information currently available to Cascadia Minerals Ltd. ("Cascadia") and Cascadia provides no assurance that actual results will meet management's expectations. In certain cases, forward-looking information may be identified by such terms as "anticipates", "believes", "could", "estimates", "expects", "may", "shall", "will", or "would". Forward-looking information contained in this presentation is based on certain factors and assumptions regarding, among other things, the estimation of mineral resources, the realization of resource estimate, gold metal prices, the timing and amount of future exploration and development expenditures, the estimation of initial and sustaining capital requirements, the estimation of labour and operating costs, the availability of necessary financing and materials to continue to explore Cascadia's projects, the progress of exploration and development activities, the receipt of necessary regulatory approvals, the completion of environmental assessment processes, and assumptions with respect to currency fluctuations, environmental risks, title disputes or claims, and other similar matters. While Cascadia considers these assumptions to be reasonable based on information currently available to it, they may prove to be incorrect.

Forward-looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Cascadia to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. Such factors include risks inherent in the exploration and development of mineral deposits, including risks relating to changes in project parameters as plans continue to be refined, risks relating to variations in mineral resources, grade or recovery rates resulting from current exploration and development activities, risks relating to changes in commodity prices and the worldwide demand for and supply of copper and gold, risks related to increased competition in the mining industry generally, risks related to current global financial conditions, uncertainties inherent in the estimation of mineral resources, access and supply risks, reliance on key personnel, operational risks inherent in the conduct of mining activities, including the risk of accidents, labour disputes, increases in capital and operating costs and the risk of delays or increased costs that might be encountered during the development process, regulatory risks, including risks relating to the acquisition of the necessary licenses and permits, financing, capitalization and liquidity risks, including the risk that the financing necessary to fund future exploration and development activities may not be available on satisfactory terms, or at all, risks related to disputes concerning property titles and interest, and environmental risks. This list is not exhaustive of the factors that may affect any of Cascadia's forward-looking information. These and other factors should be considered carefully and readers should not place undue reliance on Cascadia's forward-looking information. Cascadia does not undertake to update any forward-looking information that may be made from time to time by Cascadia or on its behalf, except in accordance with applicable securities laws.

QUALIFIED PERSON

Andrew Carne, M.Eng., P.Eng., Cascadia's VP Corporate Development, is a qualified person for the purposes of National Instrument 43-101. All technical information contained in this presentation has been approved by Andrew Carne.

Carmacks Project

The Mineral Resources and economic analysis disclosed here are referenced from the 2023 Technical Report on the Carmacks Project Preliminary Economic Assessment, authored by SGS Canada Inc. Pricing for the Carmacks Project PEA base case economic analysis was US \$3.75/lb copper, US \$1,800/oz gold, and US \$22/oz silver at an exchange rate of \$1:US\$0.75. The results of the Carmacks preliminary economic assessment are preliminary in nature, it includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the preliminary economic assessment will be realized. Reported lengths are drilled widths. Estimated true widths vary, and are currently unknown.

Capital Structure (July 6, 2026)

Shares Outstanding	209,313,778
Warrants (\$0.15 - \$0.48)	57,211,894
Options (\$0.15 - \$0.80)	12,253,750
Restricted Stock Units	328,334
Fully Diluted	279,107,756
Market Capitalization	\$64 million
Working Capital	~\$12 million

Significant Holders (July 6, 2026)

Agnico Eagle Mines Limited	14.0%
Michael Gentile	7.1%
Mackenzie Investments	6.2%
Hecla Mining Company	3.7%
Management & Directors	2.3%

- ▶ **Copper & gold** exploration in Yukon's **Minto Copper Belt**
- ▶ Anchored by advanced-stage Carmacks Copper-Gold Deposit
- ▶ **Strategic Exploration Alliance with Agnico Eagle Mines**
- ▶ Experienced management team with **strong discovery track record** in Yukon

Management Team

- ▶ **Graham Downs**, President & CEO, Director
- ▶ **Andrew Carne**, M.Eng., P.Eng., VP Corporate Development
- ▶ **Thomas Hawkins**, Ph.D., P.Geo., VP Exploration
- ▶ **Jasmine Lau**, Bcom., CPA, Chief Financial Officer
- ▶ **Shayla Forster**, Corporate Secretary

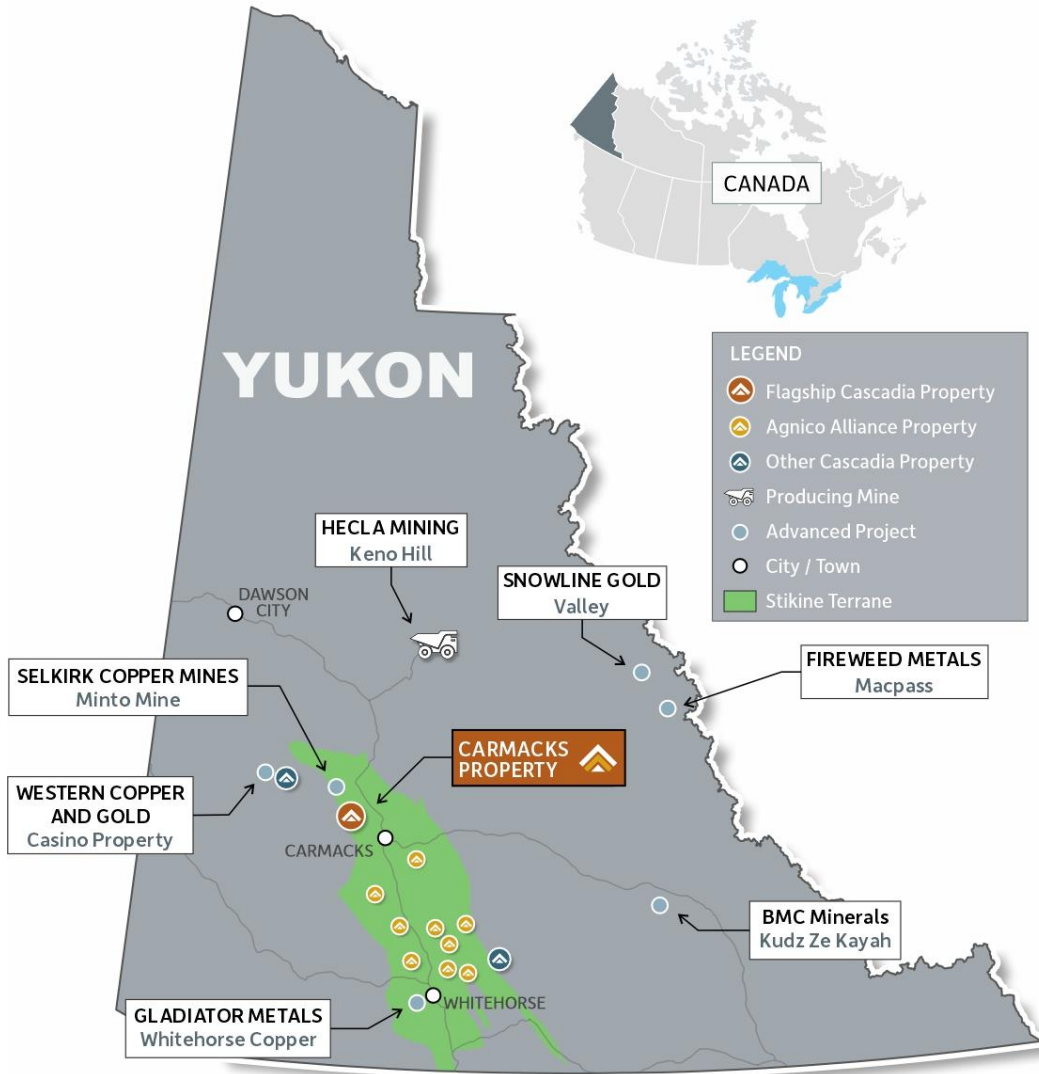

Board of Directors

- ▶ **Robert Dixon**, Chairman
- ▶ **Graham Downs**, Director
- ▶ **James Gray**, Director
- ▶ **Maureen Upton**, Director
- ▶ **Bruce Youngman**, Director
- ▶ **Paul West-Sells**, Director
- ▶ **Timothy Johnson**, Director

Technical Committee

- ▶ **Rob Carne**, Chair, former President of ATAC Resources
- ▶ **Ed Cope**, Former VP Exploration, North America, for Barrick Gold Corporation
- ▶ **Bill Wengzynowski**, Long-time Yukon prospector
- ▶ **Adam Coulter**, Former VP Exploration for Cascadia and ATAC Resources

Exploring for **COPPER & GOLD** in Yukon, Canada

CARMACKS PROPERTY

- ✓ **M&I Resource:** 651 Mlbs Cu and 302 koz Au at 1% CuEq
- ✓ **2023 PEA:** \$330M Post-Tax NPV_(5%) at US\$4.25/lb Cu, US\$2,000/oz Au
- ✓ **District-scale discovery potential, 40 km from past-producing Minto Mine**
- ✓ **Road-Accessible, low cost of drilling**
- ✓ **15,000 m of drilling underway – largest program since 2007**
- ✓ **Targeting Prefeasibility in 2028**

AGNICO EAGLE EXPLORATION ALLIANCE

- **Strategic Exploration Alliance with Agnico Eagle Mines Limited**
- **Stikine Terrane extends from BC's Golden Triangle and has significant gold-copper discovery potential**
- **Up to \$5 million in exploration funded by Agnico is planned for the 2026 field season**

Carmacks Property

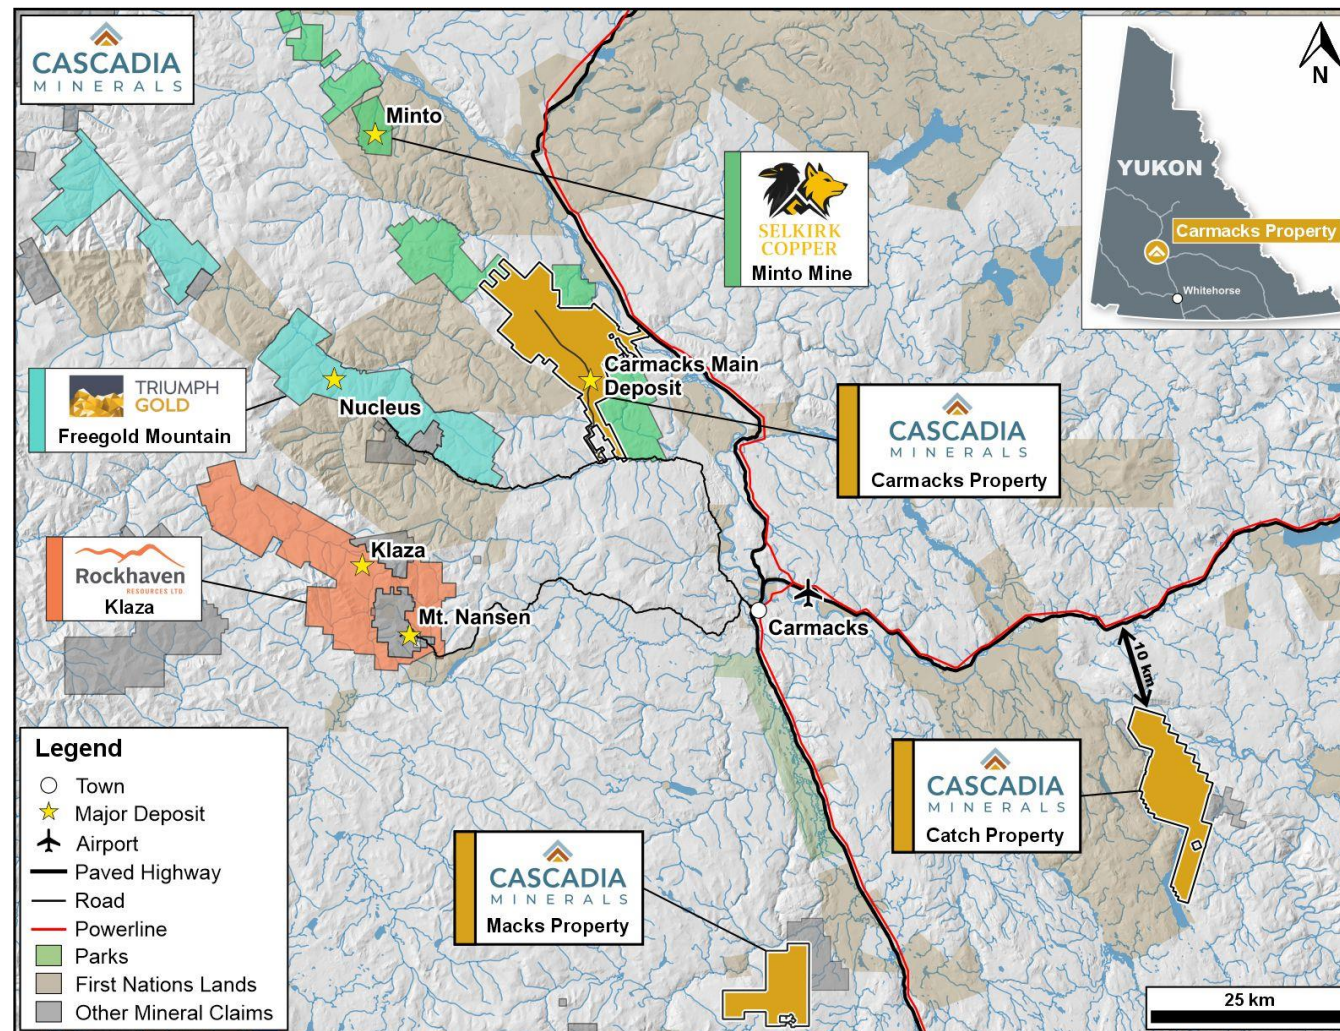

- ▶ **Building Relationships:** Traditional Territory of the Little Salmon Carmacks and Selkirk First Nations
- ▶ **Robust Infrastructure:** road-accessible, 10 km from power
- ▶ **District Scale:** 180 km² land position in the Minto Copper Belt, 40 km southeast of the past-producing Minto Mine
- ▶ **Near-Deposit Exploration Potential**
 - Historical focus on oxide material, with limited drilling targeting sulfides
 - Extensive 2022 IP survey has seen minimal follow-up
- ▶ **2023 PEA: \$330M post-tax NPV (5%), 38% IRR** with \$220M initial capex
- ▶ **10-year Class 4 Exploration Permit Valid Until 2035**

2022 Mineral Resource

A Rare, Road-Accessible Copper-Gold Deposit in a Mining Friendly Jurisdiction

Carmacks Deposit – 2023 PEA

Key Parameters

- C\$220M initial capital cost
- 9-year initial mine life
- 7,000 tonne per day mill
- Cu Recovery: 92% Sulfide, 55% Oxide
- Au Recovery: 58%
- 34 M lbs CuEq/yr

Base – \$3.75 Cu, \$1,800 Au, \$22 Ag

Case 1 – \$4.25 Cu, \$2,000 Au, \$25 Ag

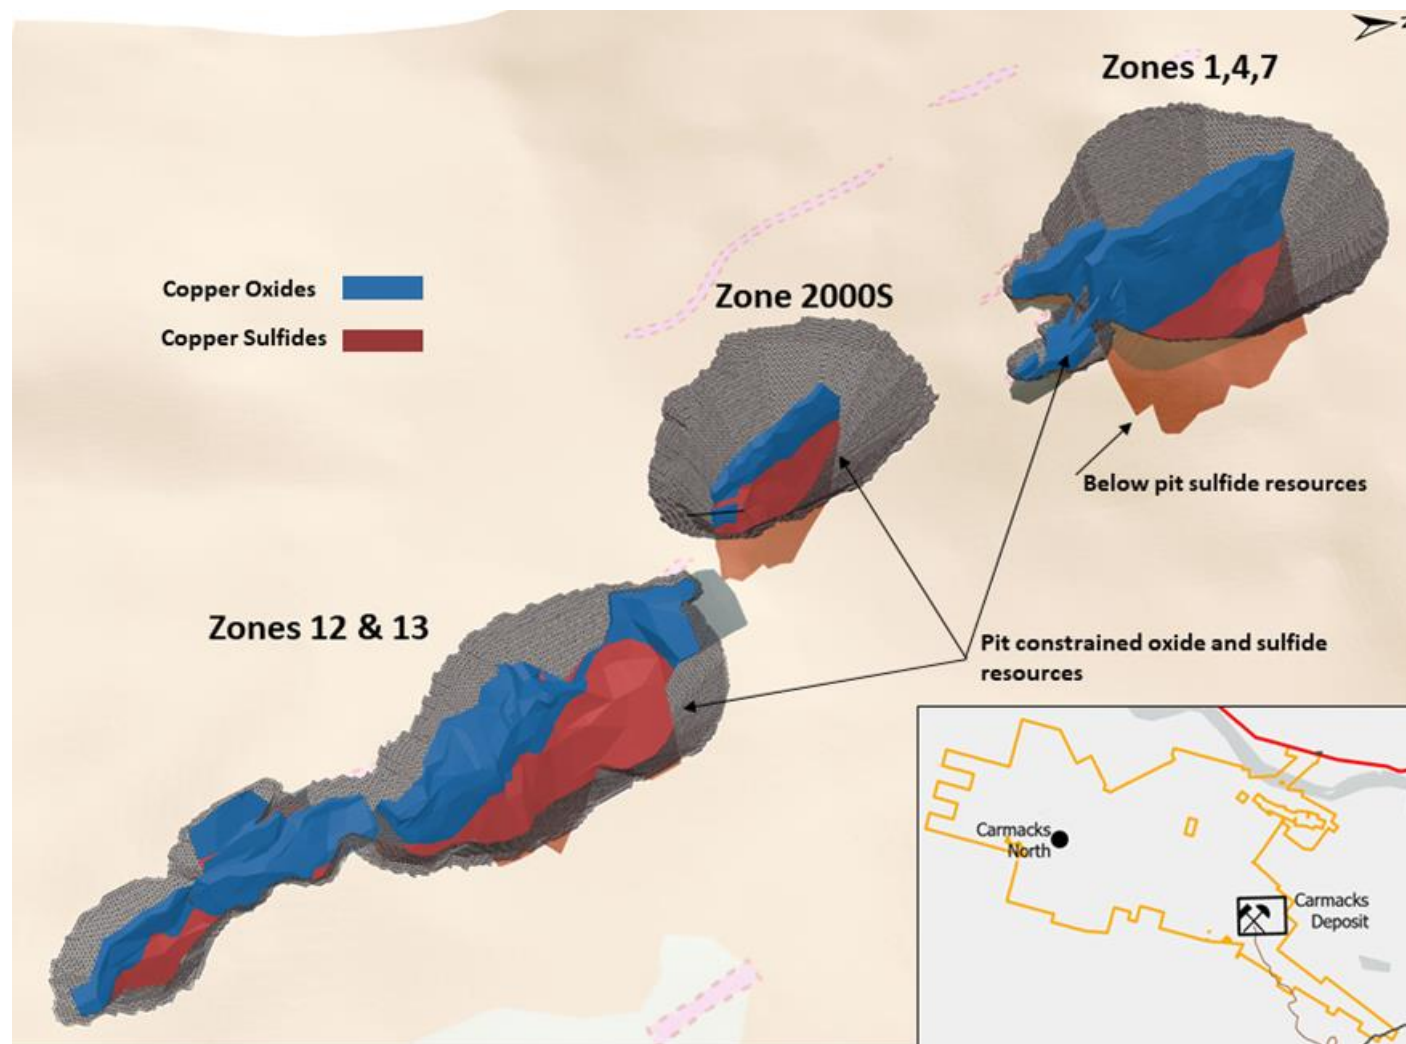

- ✓ \$324M NPV^{5%} pre-tax
- ✓ \$230M NPV^{5%} post-tax
- ✓ Payback in 2 years
- ✓ 29% IRR post-tax
- ✓ C\$475M NPV^{5%} pre-tax
- ✓ C\$330M NPV^{5%} post-tax
- ✓ Payback in 1.5 years
- ✓ 38% IRR post-tax

Pre-Tax NPV^{5%} Sensitivity (C\$M)

Gold Price US\$/oz	Copper Price, US\$/lb						
	\$3.50	\$3.75 Base Case	\$4.00	\$4.25 Case 1	\$4.50	\$4.75	\$5.00
1,800 Base	\$262.2	\$324.1	\$385.9	\$447.8	\$509.6	\$571.4	\$633.3

Opportunities

- ▶ **Improved Metal Prices** – significant upside with current metal prices
- ▶ **Resource Growth** – Zones are open at depth and along strike, with historical work focused on oxides and limited drilling targeting sulfide mineralization. Recent favourable sulfide metallurgy unlocks targeting growth of sulfide mineralization.
- ▶ **New Discoveries** – the 180km² property covers a large portion of Minto Copper Belt and has not seen systematic exploration. Significant geophysical targets are ready for trenching and drill testing.

Carmacks Deposit – Long Section & 2026 Drilling

Historical exploration focused on shallow copper oxide mineralization

2026 drilling: >8,000 m completed of a planned 15,000 m expansion program in 2026

Zone 147

Historical Drill Highlights

- ▶ **CD-25-041: 98.16 m of 0.92% Cu, 0.11 g/t Au**
- ▶ **CD-25-033: 83.52 m of 0.89% Cu, 0.26 g/t Au**
- ▶ **WC-021B*: 337.0 m of 1.28% Cu, 0.73 g/t Au**

*WC-021B is a high-angle hole and not representative of true width

Zone 2000S

Historical Drill Highlights

- ▶ **CRM26-046: 106.62 m of 0.79% Cu, 0.28 g/t Au**
- ▶ **CRM21-011: 105.52 m of 0.96% Cu, 0.18 g/t Au**
- ▶ **CRM-21-006: 49.00 m of 0.87% Cu, 0.17 g/t Au**

Zone 1213

Historical Drill Highlights

- ▶ **CD-25-035: 60.12 m of 0.84% Cu, 0.16 g/t Au**
- ▶ **CD-25-036: 95.10 m of 0.63% Cu, 0.14 g/t Au**
- ▶ **CRM21-025: 119.40 m of 0.76% Cu, 0.14 g/t Au**
- ▶ **CRM20-001: 127.27 m 0.61% Cu, 0.13 g/t Au**

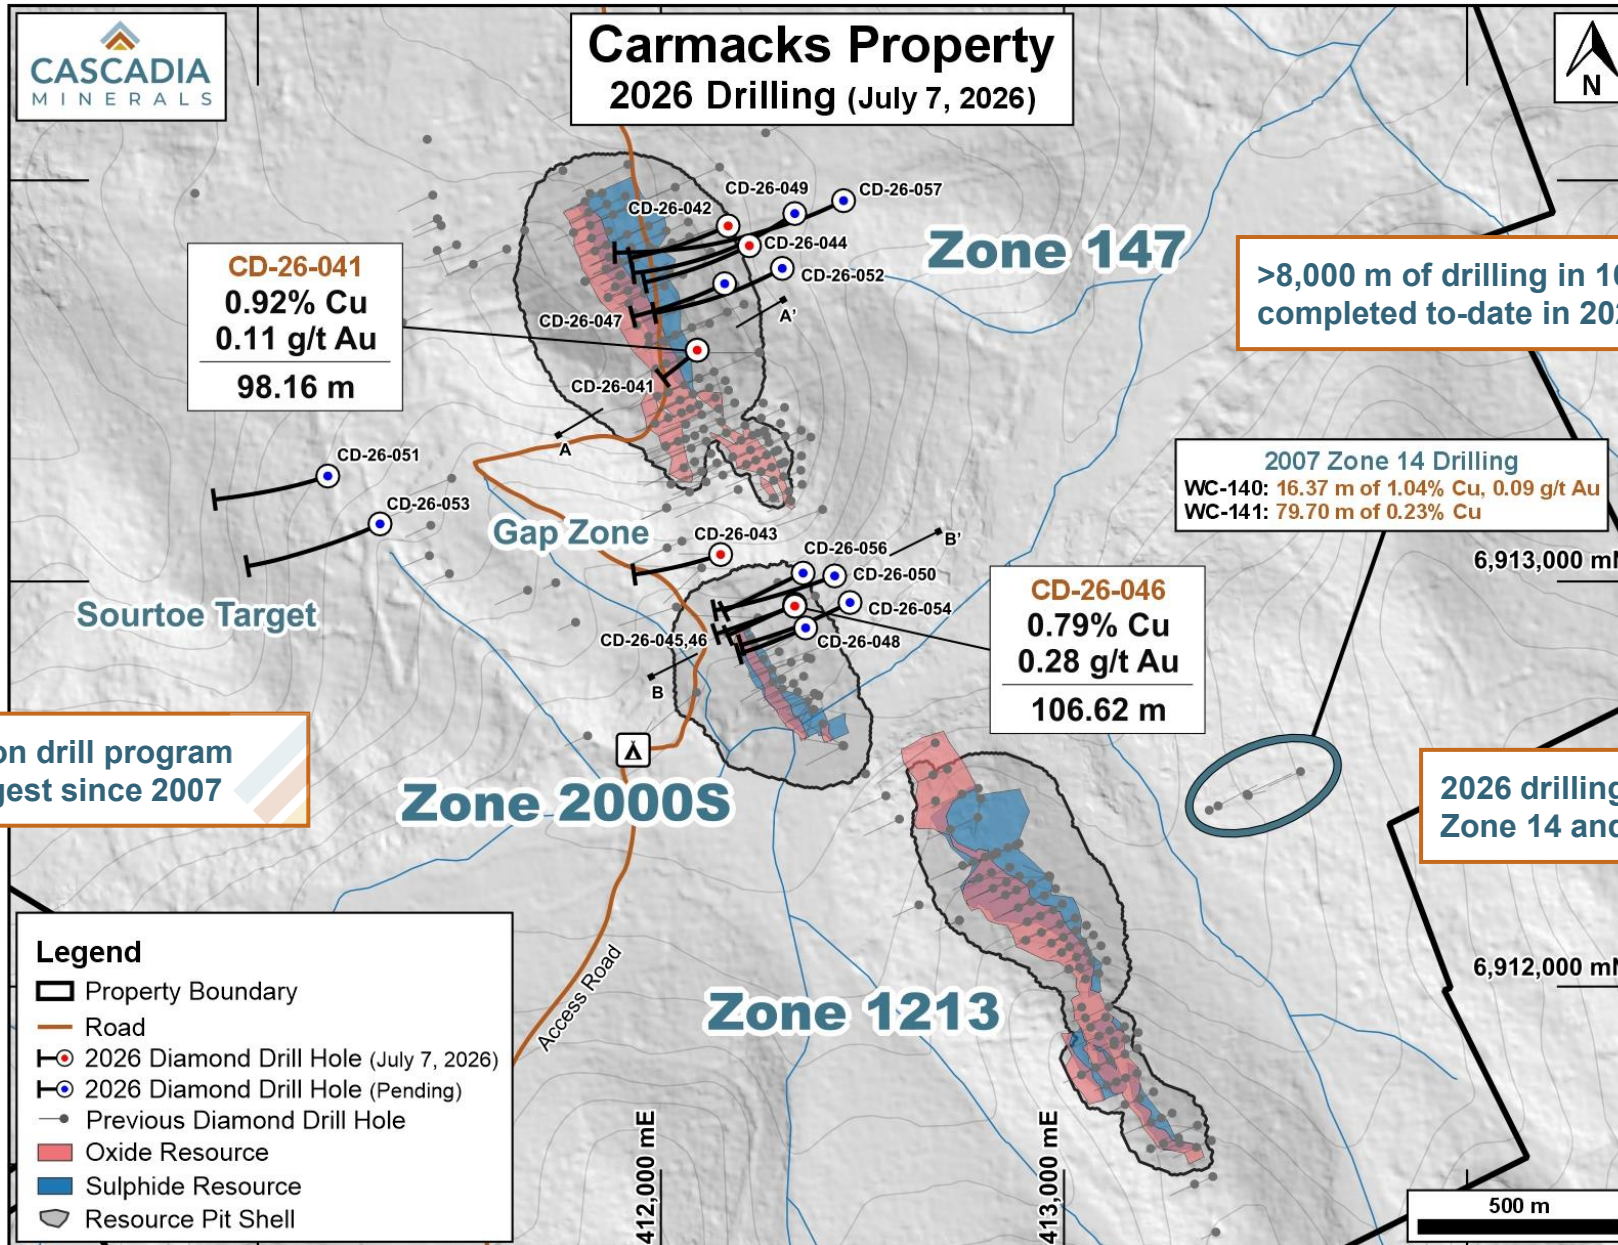

Legend

Copper Grade (%)

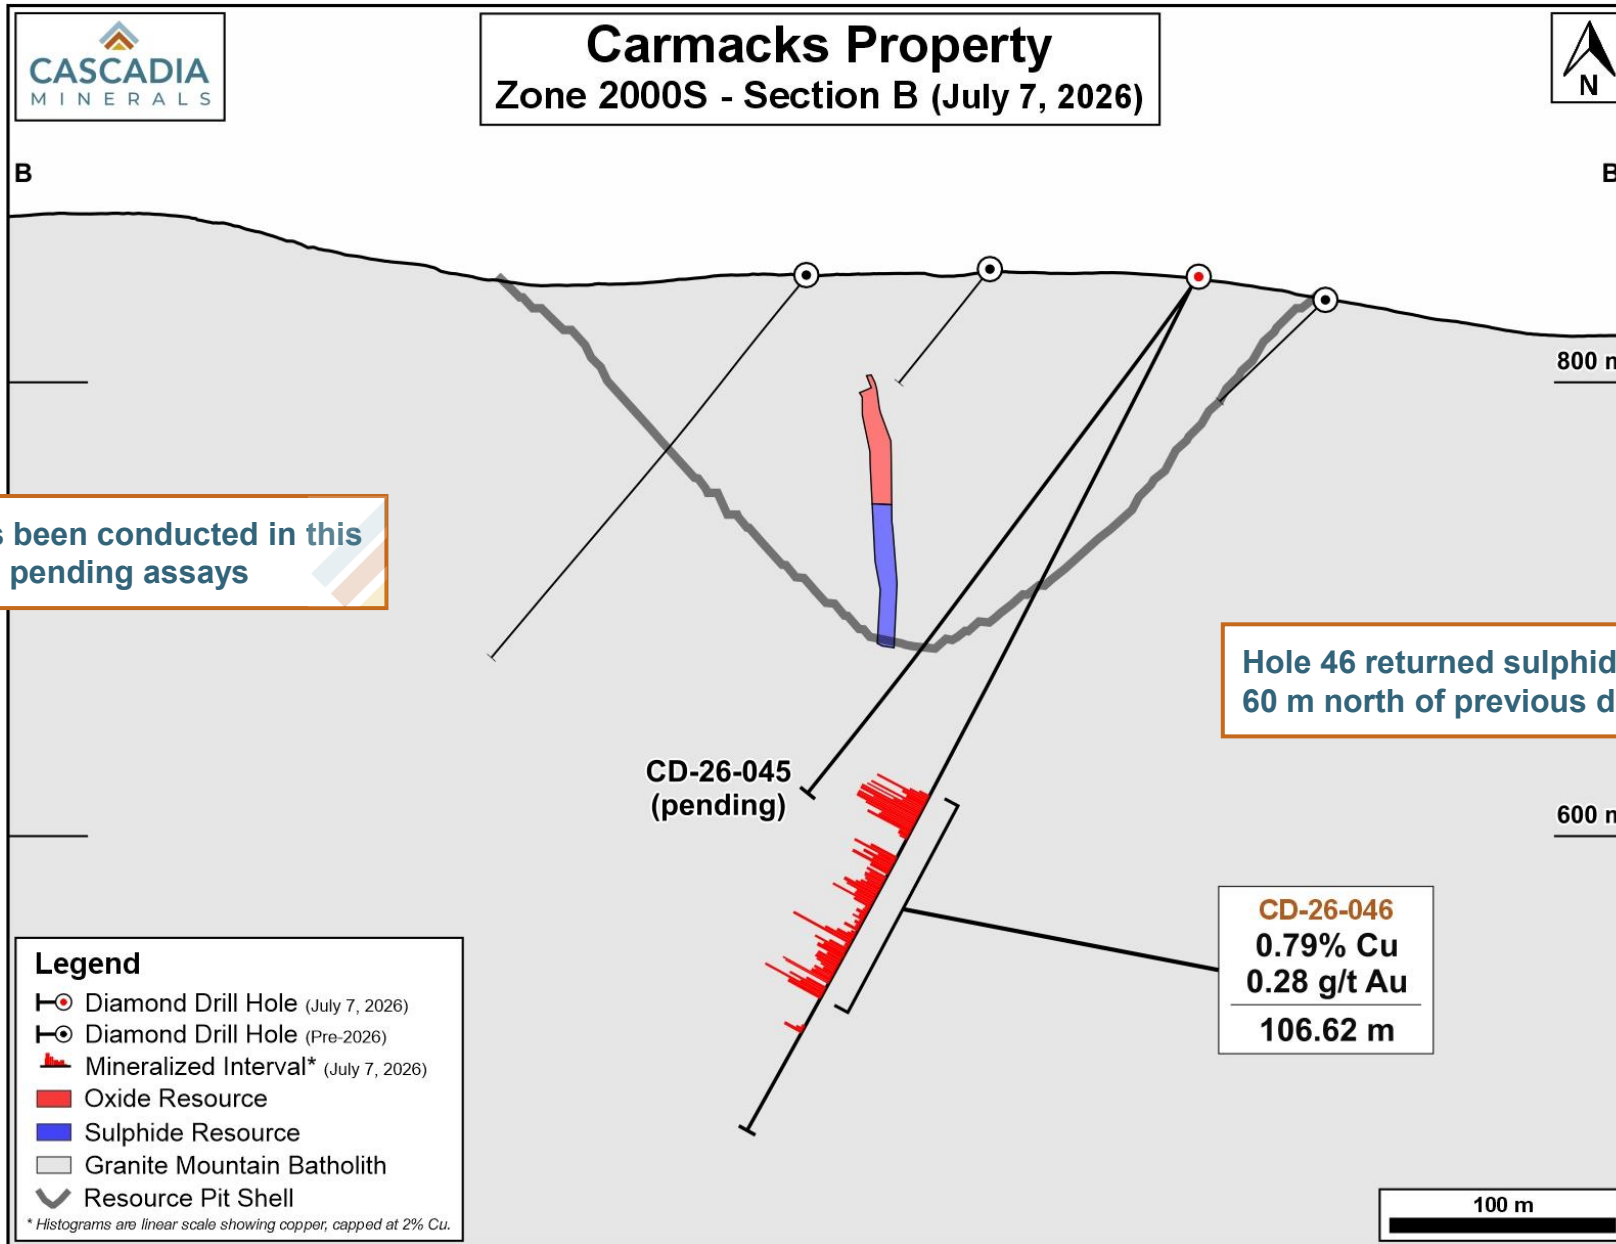

- ▶ 2025 Drill Hole
- ▶ Oxide Resource
- ▶ Sulphide Resource
- ▶ Open Pit Shell

Carmacks Property – Deposit Area Map

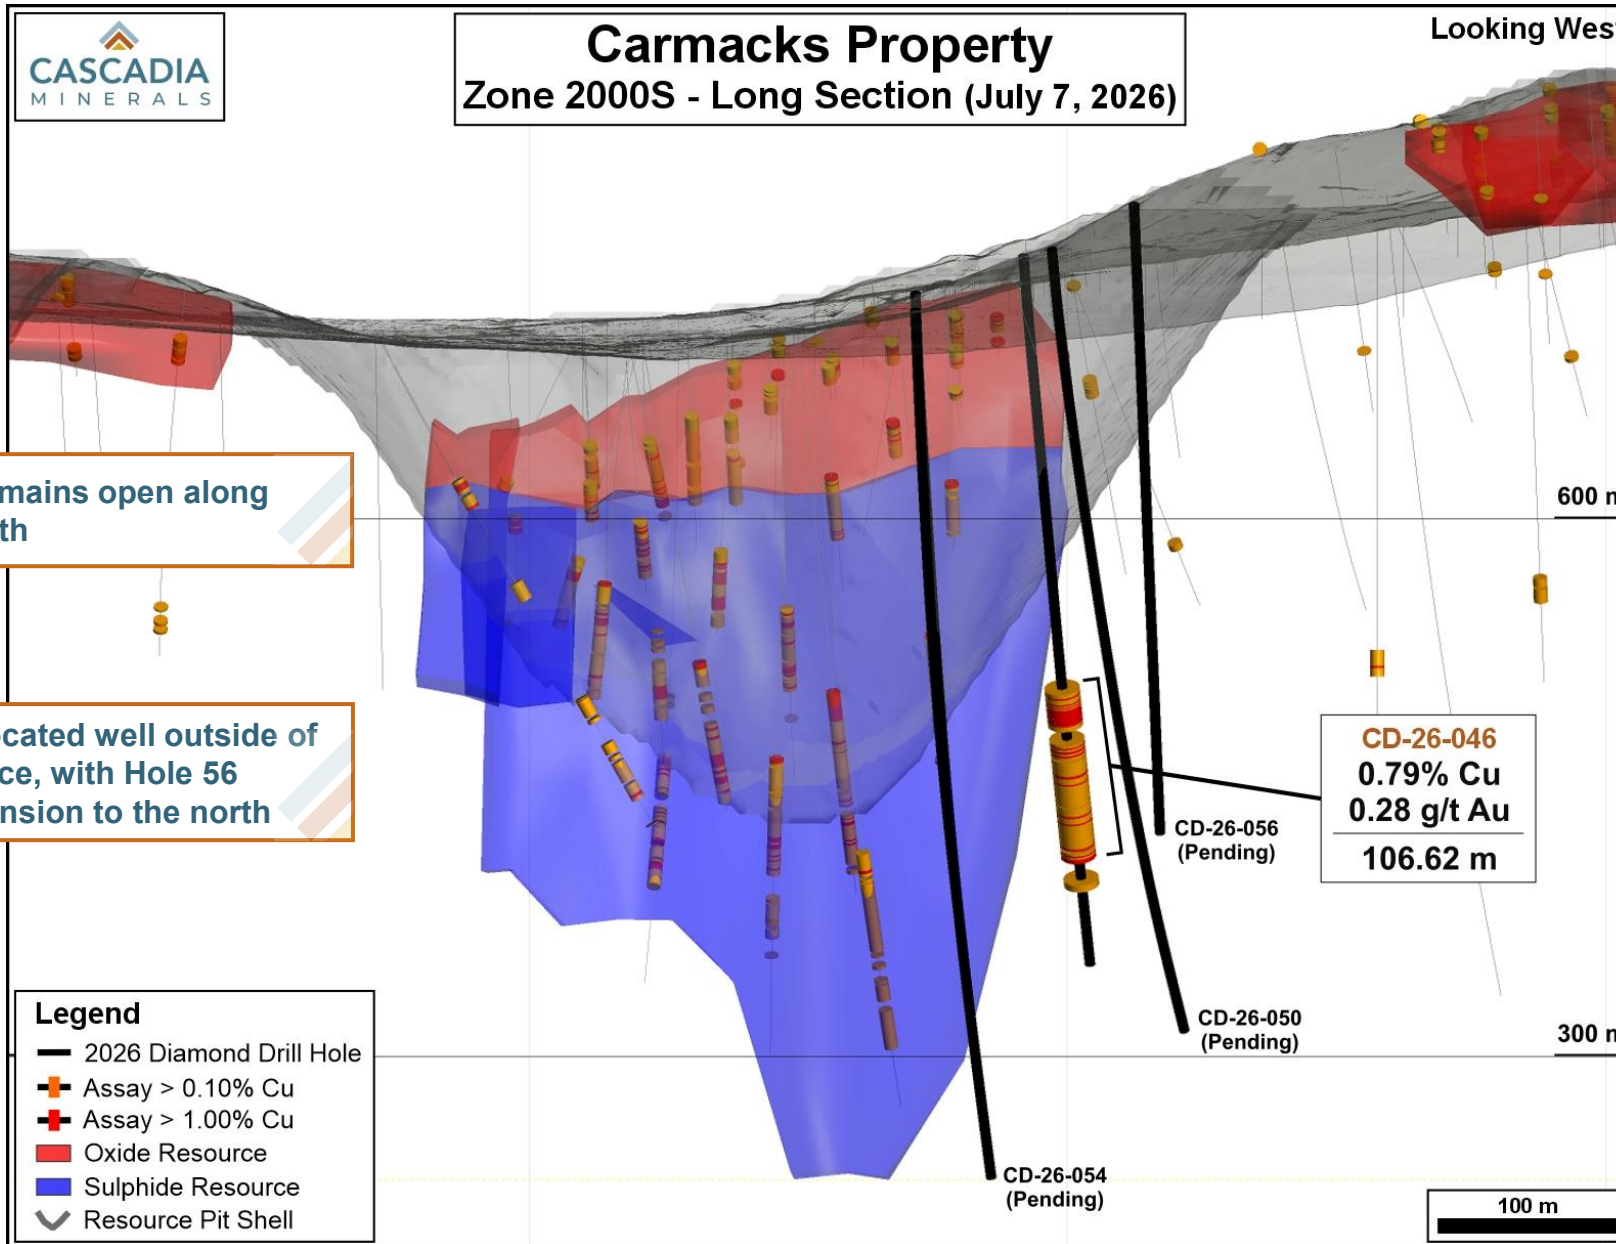

Carmacks Property – Zone 147, Section A

Limited prior drilling has been conducted in this area, with multiple holes pending assays

Hole 46 returned sulphide mineralization 60 m north of previous drilling

Carmacks Property – Zone 147, Section A

Mineralization remains open along strike and at depth

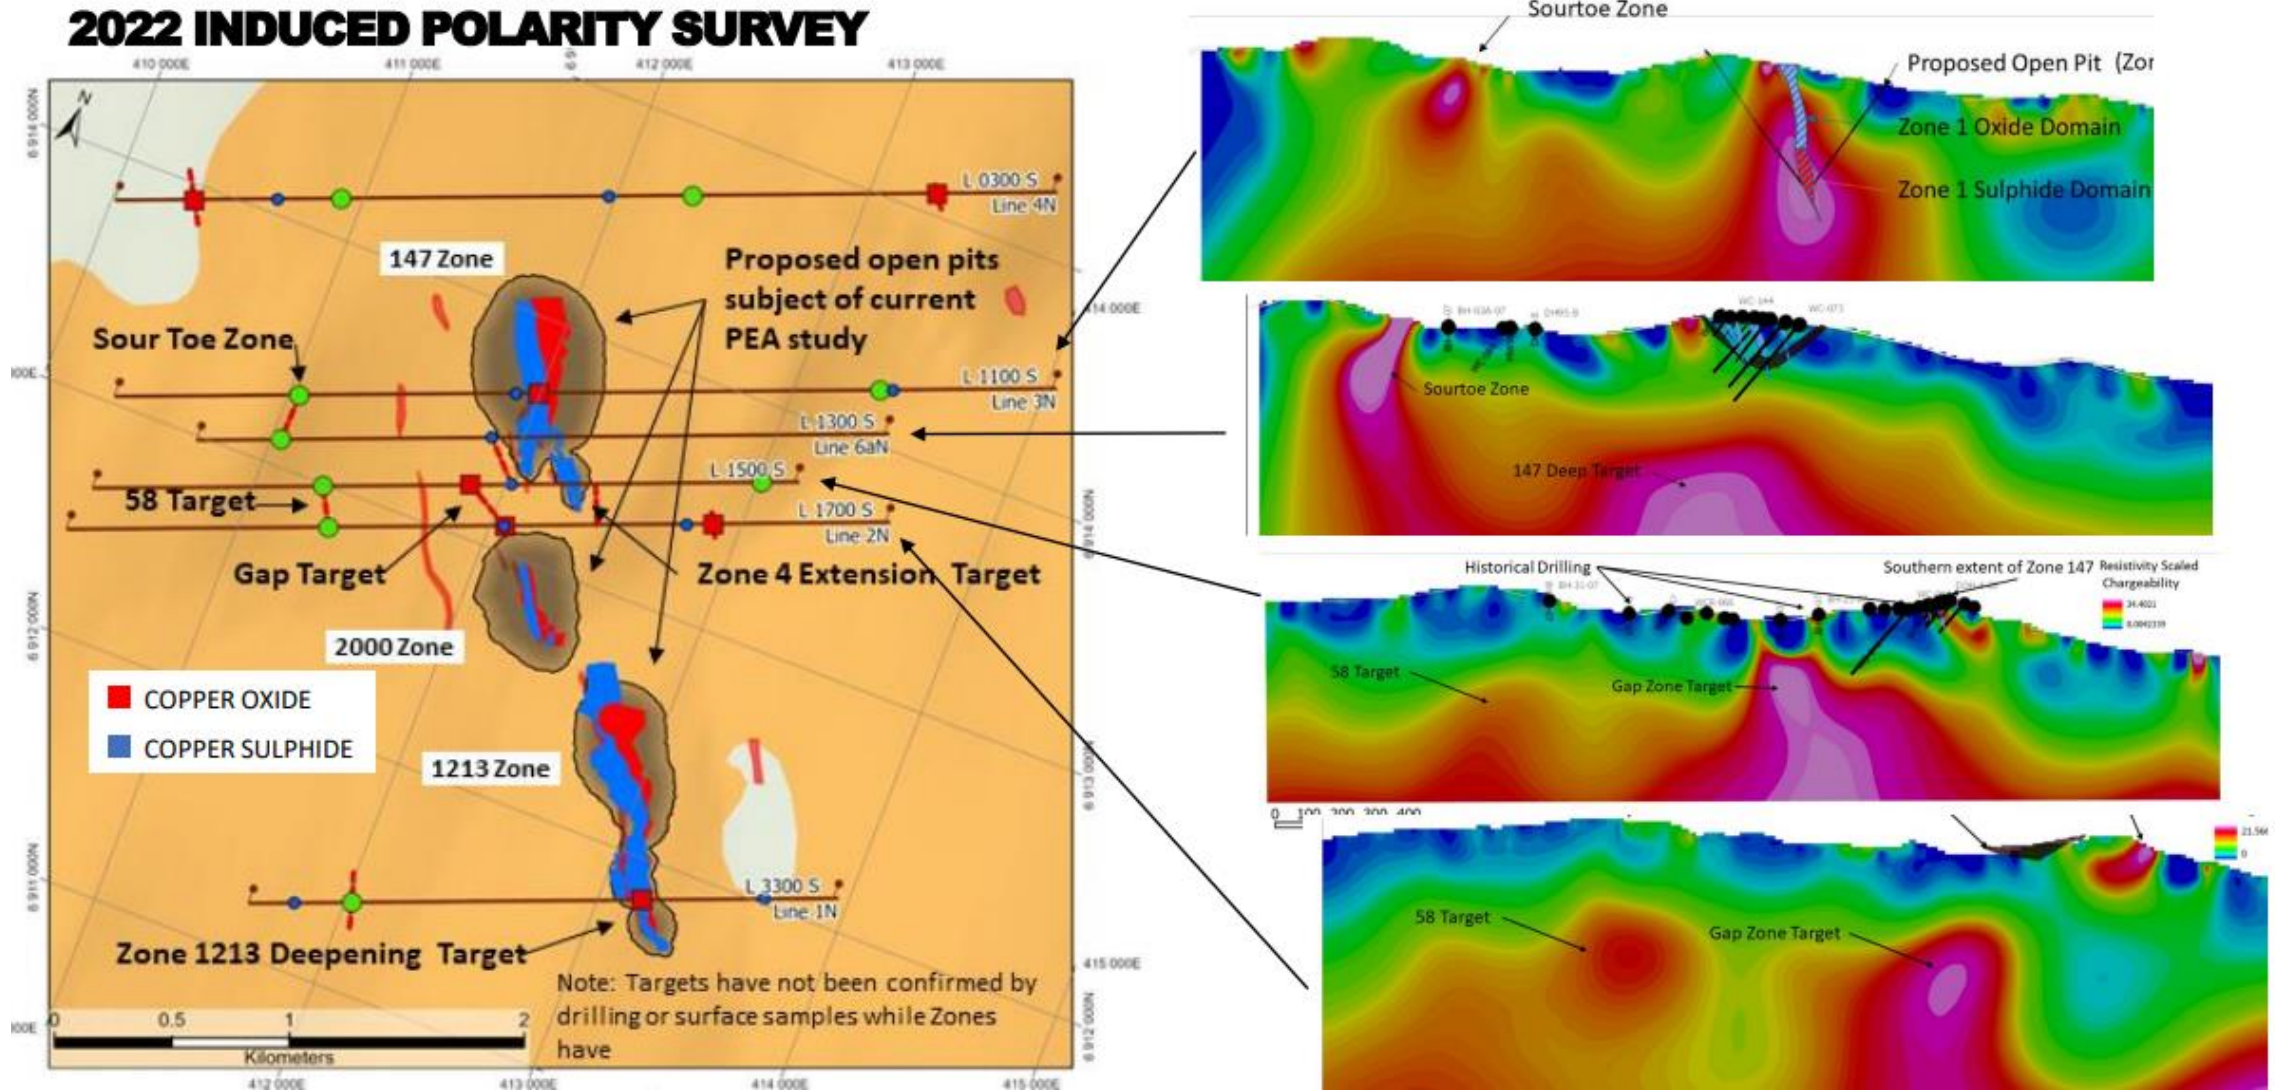

Hole 46 intersect located well outside of the Mineral Resource, with Hole 56 testing further extension to the north

CD-26-046 Core Photos – Zone 2000S

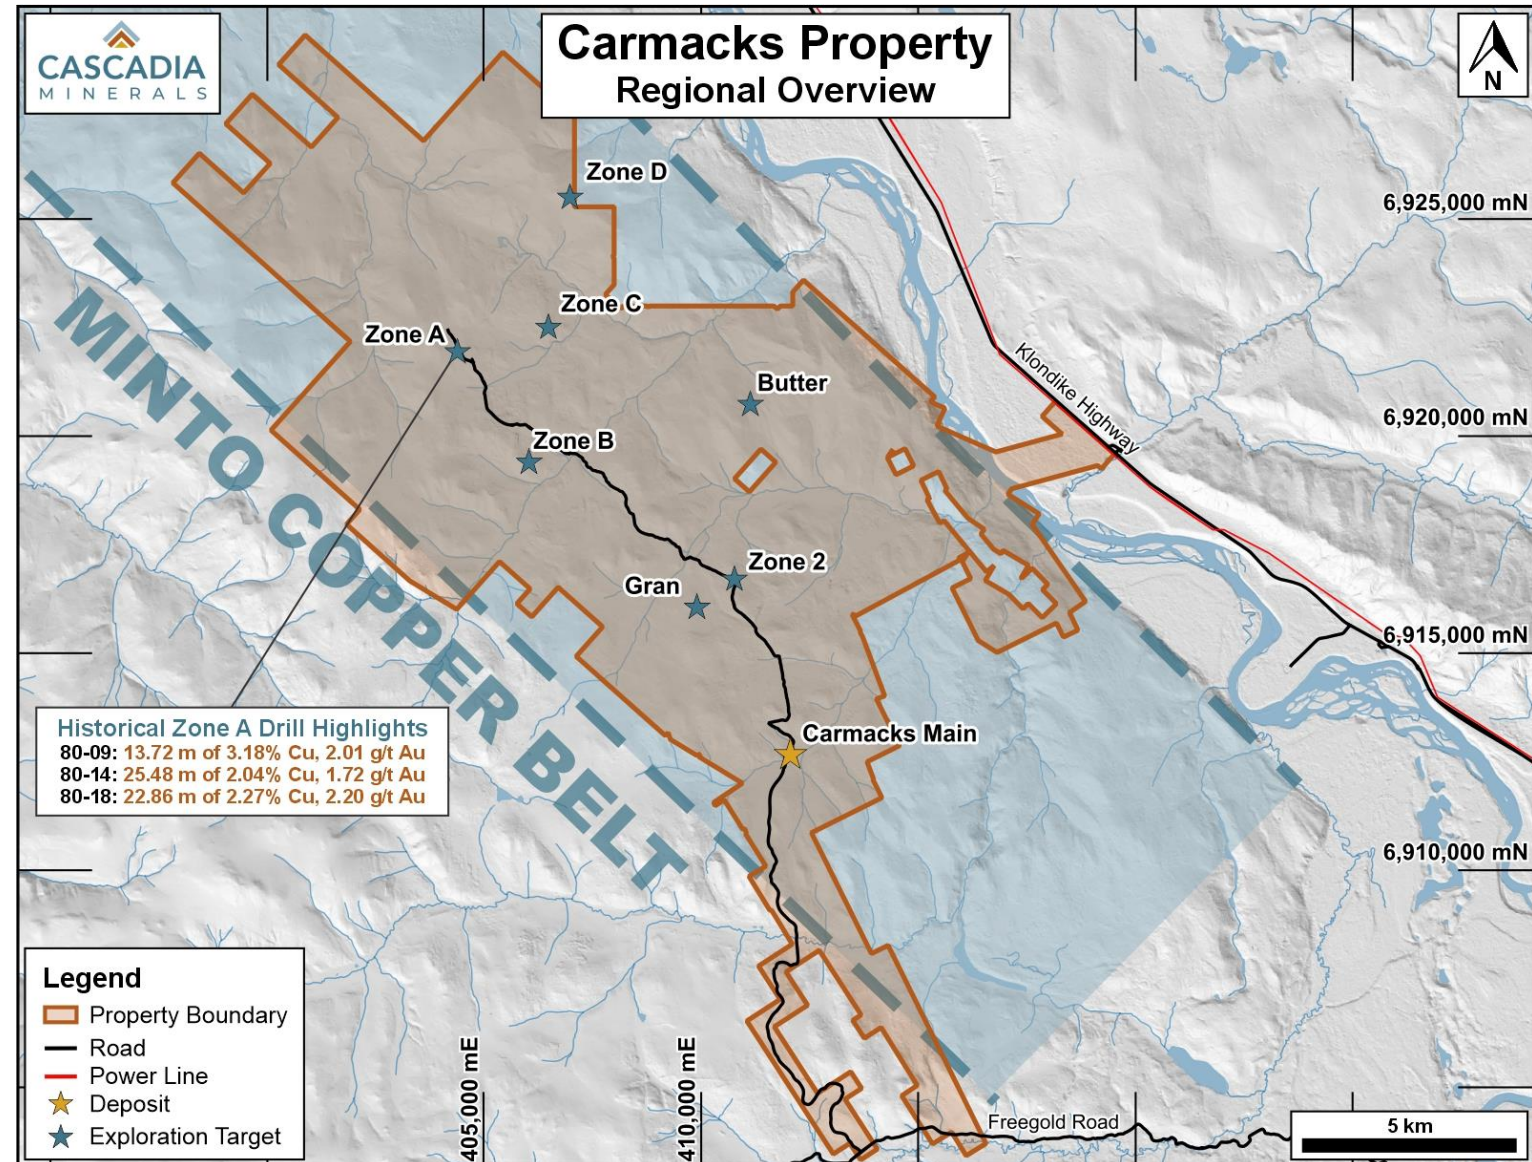

Carmacks Project – Near-Deposit IP Targets

2022 IP Survey identified numerous targets close to the deposit – minimal follow-up to date

Minto Copper Belt – Untapped Regional Potential

- ▶ 180 km², brownfields property covering large portion of the Minto Copper Belt towards Minto Mine
- ▶ **Multiple near-deposit targets identified for follow-up**, with four significant IP targets <1 km from current resource
- ▶ Goldspot completed digitization and compilation of historical data in 2021, identifying numerous targets that have yet to see follow-up
- ▶ **Historical drilling in 1980 at Zone A returned high grade mineralization across 350m of strike length**

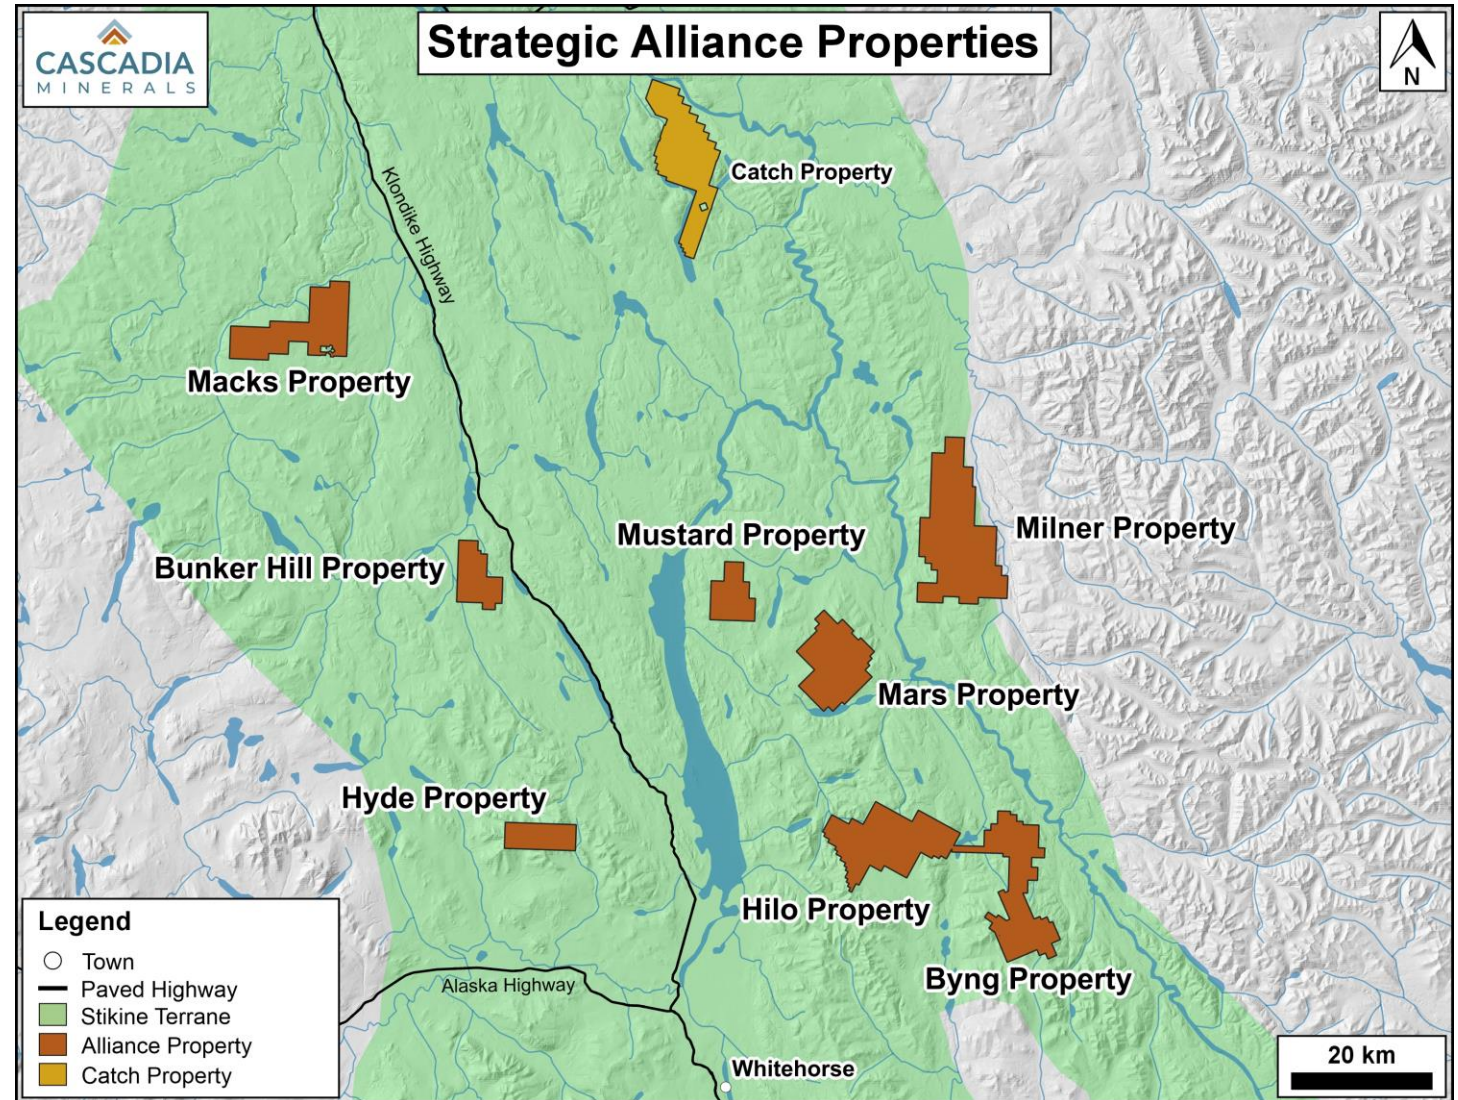

Rapid Advancement of a Near-Term Critical Minerals Project

- ✓ Acquisition of Granite Creek Copper closed in August 2025
- ✓ 3,800 m resource expansion drill program completed in fall 2025
- ❑ **15,000+ m fully-funded drill program underway**
- ❑ 2026 and 2027 drilling to expand resource and test nearby targets
- ❑ **Updated resource in 2027**, targeting doubling of sulfide material
- ❑ Optimize metallurgical recoveries and commence engineering work
- ❑ Collect environmental baseline data to prepare for permitting
- ❑ **Target pre-feasibility study by 2028**

▲ Agnico Eagle Strategic Exploration Alliance

- ▲ **Multi-year Strategic Alliance** focused on gold and copper exploration in Yukon's Stikine Terrane
- ▲ Stikine Terrane extends into Yukon from BC's Golden Triangle and is **highly prospective for gold-copper porphyry mineralization**
- ▲ **Minimum of \$500,000/yr of generative exploration** will be funded by Agnico Eagle
- ▲ Agnico Eagle can earn up to an 80% interest in the Catch Property
- ▲ **Up to \$5 million in exploration is planned for the 2026 field season** under the Strategic Alliance and Catch Earn-in

1. Carmacks Project – 100% Owned Flagship Property

- ▶ Fully-funded 15,000+ m drill program underway
 - ▶ Approximately 10,000 m focused on step-outs to expand the existing deposit
 - ▶ Remaining 5,000 m will test near-deposit and regional targets outside the resource
 - ▶ Targeting near-term doubling of mineral resources
- ▶ Metallurgical, Mining, Geotechnical and Environmental studies to prepare for prefeasibility and permitting
- ▶ Geophysical Surveys for additional target identification property-wide
- ▶ Continue to advance Carmacks towards development

2. Strategic Alliance Exploration (Agnico-funded)

- ▶ Grassroots exploration in the Yukon Stikine Terrane, which is highly prospective for gold-copper porphyry mineralization
- ▶ Advance geological understanding of the Byng, Catch, Hilo, Hyde, Macks, Mars, Milner, Mustard properties

Combined strategy provides investors with exposure to both:

1. **Near-term advancement of a 100%-owned high-grade copper-gold asset, and**
2. **Significant upside from grassroots exploration across a broad region, funded by the Strategic Alliance**

Other Properties

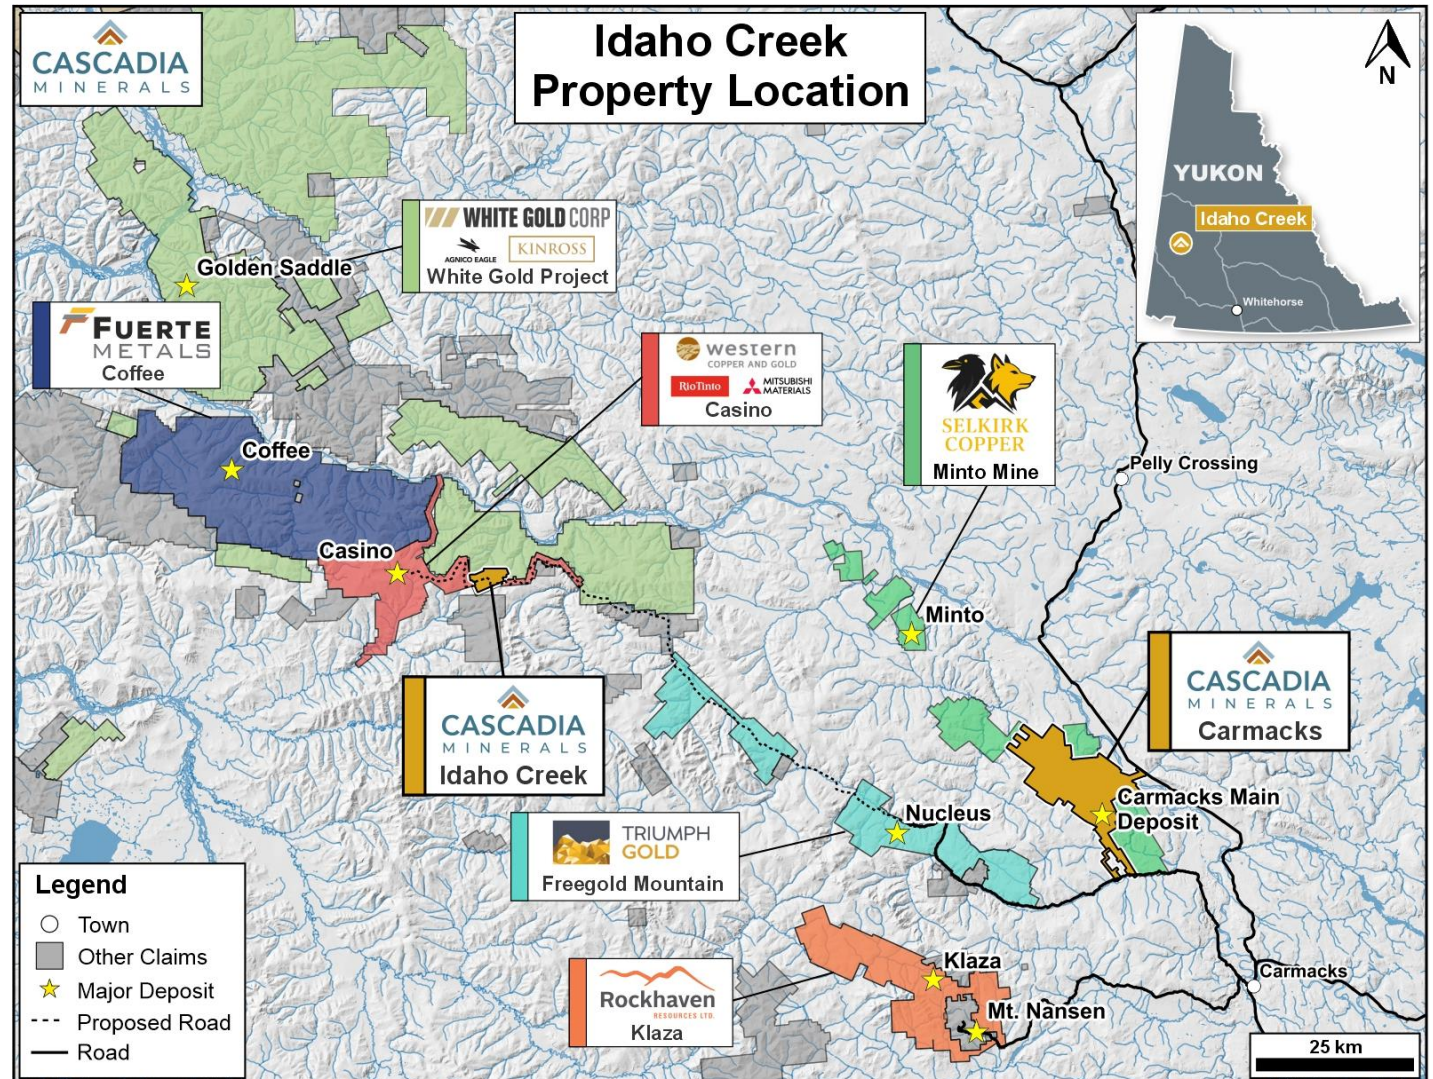

Rosy Property, Yukon

- 61 km² road accessible property located 77 km east of Whitehorse surrounding the Red Mountain Molybdenum deposit owned by Tintina Mines Ltd.
- Over 35 low sulphidation epithermal quartz-carbonate veins occur on the property
- Anomalous gold in soil over 3.8 x 2.5 km with untested high priority follow up areas with significant gold- and copper-in-soil
- Rock samples have returned up to 45.40 g/t gold, and 1,835 g/t silver
- Potential for regional-scale epithermal vein mineralization

Idaho Creek Property, Yukon

- ▲ 14 km² property located **adjacent to Western Copper and Gold's Casino Project**, where Rio Tinto and Mitsubishi Materials are strategic investors
- ▲ **14 km east of the Casino Deposit**, with Casino Suite aged intrusions mapped on property
- ▲ Casino Project proposed road route runs through the property
- ▲ Adjacent to White Gold's Betty-Ford Target where 2023 diamond drilling returned 3.33 g/t gold over 53.00 m
- ▲ Numerous high-grade Ag-Au-Pb-Zn veins have been identified on the property
- ▲ Geochemistry and alteration is suggestive that a **buried Au-Cu-Mo porphyry system is nearby**

- 2006 drilling in the east portion of the property intersected **122 m of 0.12 g/t Au with 1.93 g/t Ag**, ending in mineralization
- Rock samples have returned up to **10.08 g/t Au with 365 g/t Ag**
- Large **5 x 1 km underexplored Au-Ag-Mo-Pb soil anomaly** in the west portion of the property
